

## About Us

Total Yacht works believes in doing what's right. Here's our daily work list:

1. Do the right thing.
  2. Do what you say you're going to do.
  3. Tell the truth even when it's tough.
  4. Work together to get it done right.
  5. Take total responsibility for your decisions and your work.
  6. Meet or exceed our customer's expectations and requirements.
- Bob Buchanan is an accredited Master Marine Surveyor. He has owned and operated power and sail boats for the past 30 years. For the last 8 years he has worked exclusively in the marine industry here in Mexico - providing surveys, deliveries, repairs and installations to all mechanical and electrical systems on cruising yachts. Bob is both a certified Yanmar mechanic and Authorized "Gold" Dealer for Yanmar. The term is reserved for those accomplished-few who have qualified in Yanmar's technical training demands for Experience, Tools, Training and Parts Inventory expertise. As a Gold Dealer, Total Yacht Works is qualified and approved to work on any Yanmar engine. Bob's international surveyor training combined with his electrical background (he's a 'licensed' Journeyman Communications Electrician) and knowledge of mechanical systems, yacht maintenance and safe boating operations, enables him to inspect, diagnose, repair and service yachts with a high degree of intention and dependability. Bob currently lives aboard his 40' Acapulco cutter, Bolias Dream, and happily commutes by dinghy to the boat yard.
